Technical Specifications

Leveling

Leveling feet
(* Locker height 80in with leveling feet)

Weight (kg)

92 kg (200 lbs)

Rating (v)

12V

Rated Power (w)

60W

Operating Temperature

-30°C to 45°C
(-22°F to 113°F)

AC Voltage

Recommended: 120VAC
Minimum: 110VAC
50/60Hz nominal

Ethernet / WiFi

CAT 5 or 6 Jack or 2.4G private network with no terms & conditions to acknowledge

Available Accessories

SIM card, Router, Ethernet Cable,
Extension Cable, Extension Card, Roofing etc.
(* additional fee may apply)

Installation Requirements

Placement

- Lockers can be installed either all along one wall, or an L-shape formation
- Lockers can also be embedded in a custom space, to appear flush against a wall
- A minimum ceiling height clearance of **8 feet (96 inches)** is required to allow for safe delivery, movement, and installation of lockers.

Best Location

- Lockers must be in location protected from the elements
- Providing 24/7 locker access is recommended
- Lockers can be installed outdoors, but there are certain conditions. Please contact us for the details.

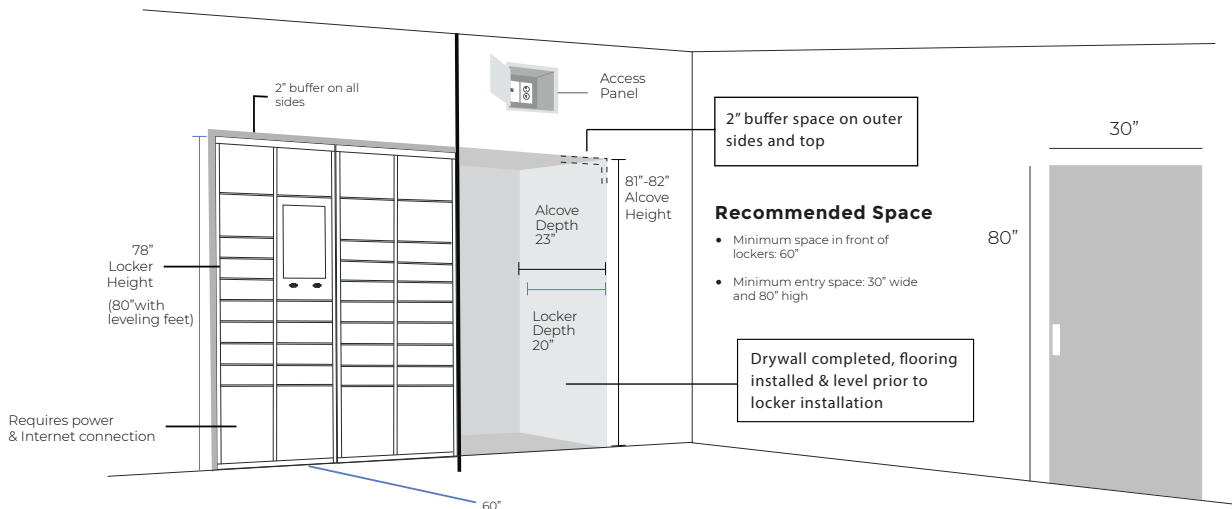

Power Supply

- One 120 VAC duplex outlet near the
- Our products are certified under the Canadian electrical safety authority certification with the (UL) Underwriters Laboratories of Canada approval

Internet Requirements

- Wifi, ethernet, or SIM connection
- 2.4G private network, with less than 10 devices connected

Alcove Guidelines

Alcove Spacing Requirements

Use these measurements to ensure that there is enough space to install and level the lockers

Height: Minimum 81"-82" alcove height required. This accommodates 80" tall leveled lockers with a buffer

Depth: Minimum 23" alcove depth required.

Buffer: There must be a 2" buffer on all outer sides to ensure the lockers fit into the space properly

Additional Alcove Guidelines

Access panel: Install an access panel to allow future access to power & data. Recessed space behind the access panel must be accessible from inside alcove & above lockers, recommended placement is above the Master unit

Flooring: Alcoves should be level with the room's floor. The floor surface inside the alcove must be leveled before installation

Floor Plan: Note that your BlueBox floor plan will reflect finished dimensions, as opposed to rough openings

Locker Construction

Standard Colour

Locker stock available

Custom Colour/Locker Customization

Select any colour shade from the RAL K7 classic colour chart or customize a locker unit. Approx. 4-6 months wait time

Electronic Parts

- 21" Touch screen display
- Router
- Secure Locks
- Circuit Board
- 2 Embedded Speakers

Operating system

- Android 5.1

Locker Material

- Galvanized Steel

Superior Construction

- Heavy duty, corrosion resistant galvanized steel for long-term durability

*Minimal BlueBox branding standard on all locker variations

Customization

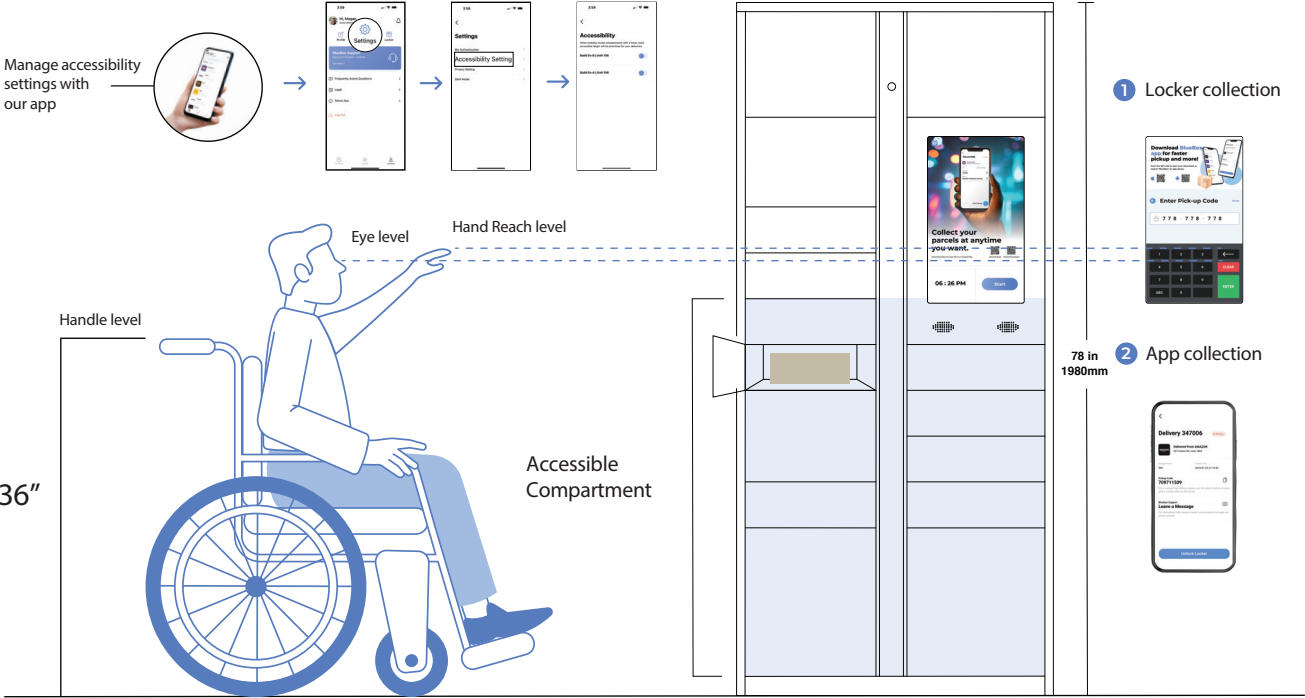

- Custom colours are available. Please ask our sales representative for more information

Accessibility Considerations

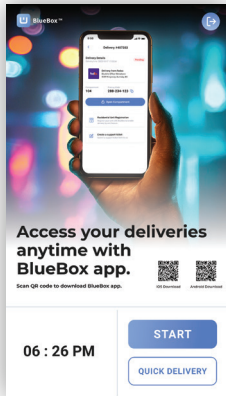

- ✓ Designed with accessibility in mind
- ✓ Residents can manage accessibility settings in BlueBox app under account settings
- ✓ Parcels can be collected in 3 seconds by using the BlueBox app
