

The Perfect Package Reception Solution

24/7 Accessible Parcel Service

1(833) 258-3269 | www.bluebits.ca | Marketing@bluebits.ca
6991 Curragh Ave #100, Burnaby, BC | 710 - 4789 Yonge St, Toronto, ON

BlueBox Features

BlueBox Smart Lockers are an advanced, easy to use service designed to meet the evolving demands driven by e-commerce. BlueBox provide an easy, secure, contact-free solution to manage the overwhelming daily deliveries with fewer staff and resources.

More Features

BlueBox is tailored to meet your unique requirements with a wide selection of locker configurations. In addition, we offer options to customize your locker unit to match any property branding or aesthetic standards.

From planning to installation and ongoing support, we partner with you to ensure our smart lockers provide an exceptional experience for you and your residents.

Contact-Free

Contactless parcel reception with our BlueBox app. Safety is our top priority.

Intuitive User Experience

Android-powered 19"x11" inch touch screen, user-friendly with **custom notice section**. Carriers can deposit either with a phone number or unit number.

Around the Clock Service

Operational 24/7, enabling anytime pick up of packages.

Call, email, or message us on our website with any questions. We want to speak with you!

Modular Design

Customization allows for properties to choose different layouts and compartment sizes based on their needs.

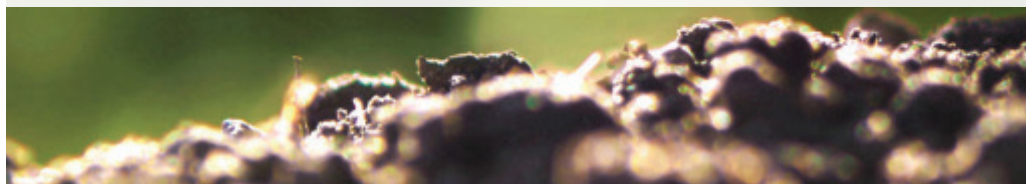

Durable Steel & Colour Coating

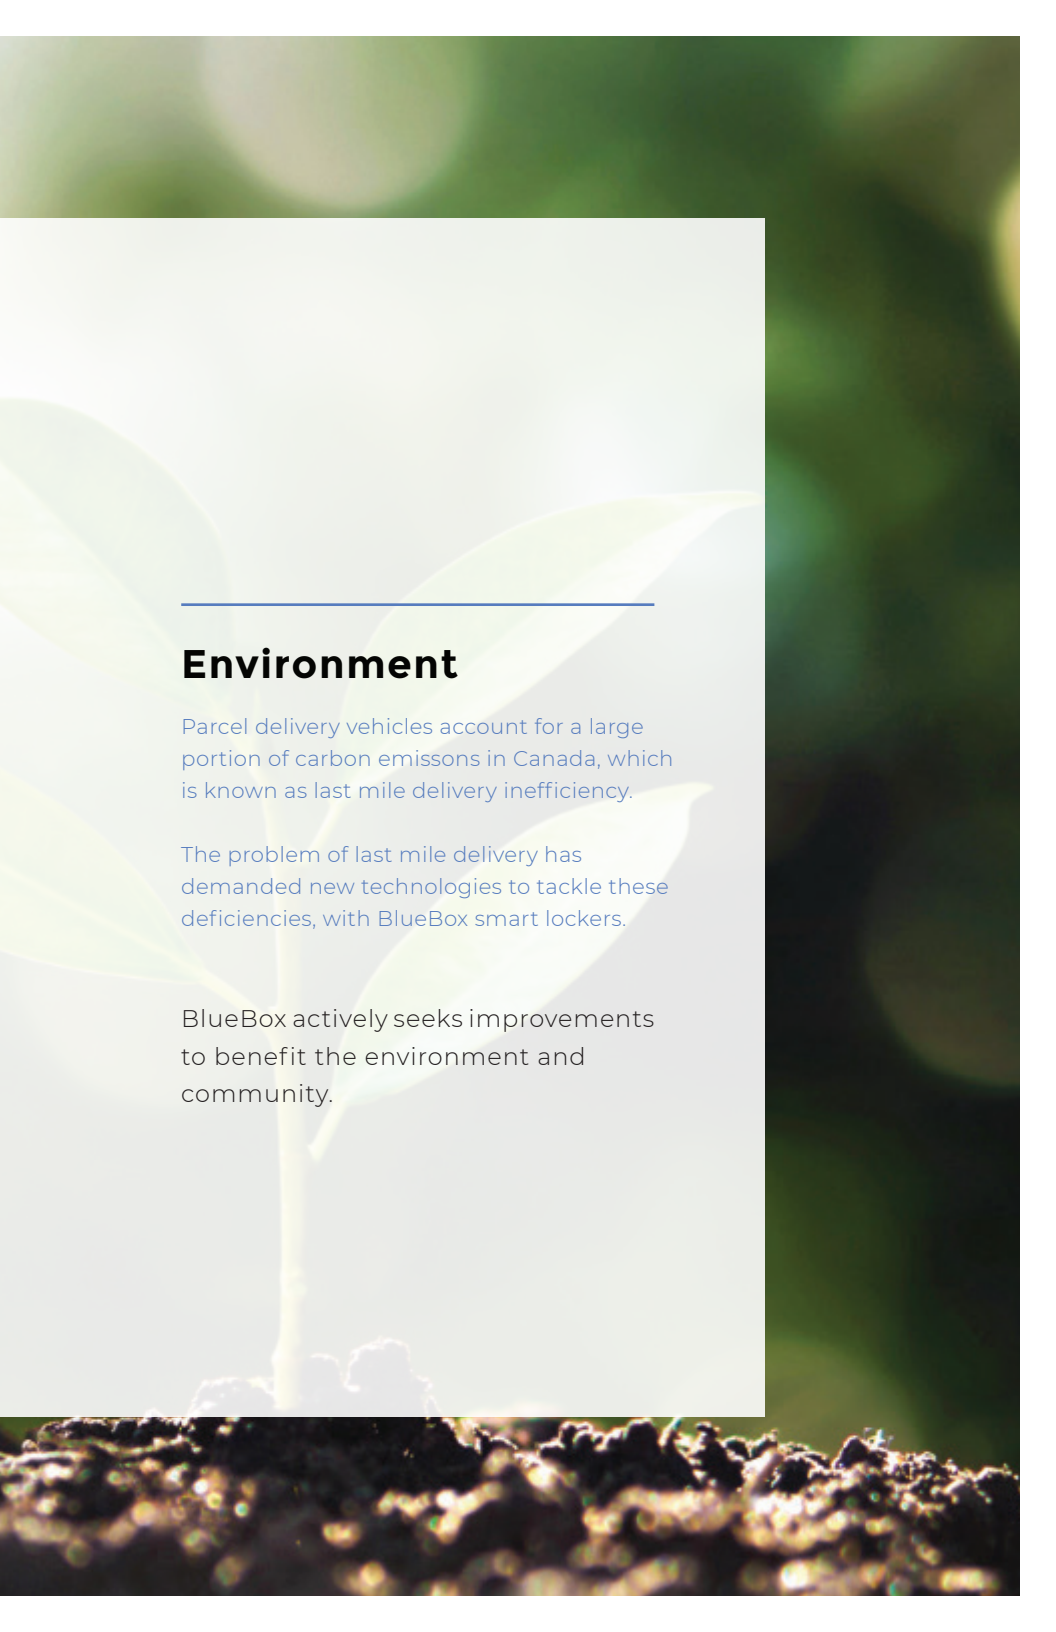

Heavy duty corrosion-resistant galvanized steel with long-lasting powder coat finish.

Language

10+ operating languages available. Building managers can configure the languages shown on the screen based on the building demographic.

Environment

Parcel delivery vehicles account for a large portion of carbon emissions in Canada, which is known as last mile delivery inefficiency.

The problem of last mile delivery has demanded new technologies to tackle these deficiencies, with BlueBox smart lockers.

BlueBox actively seeks improvements to benefit the environment and community.

Comprehensive Contactless Solution

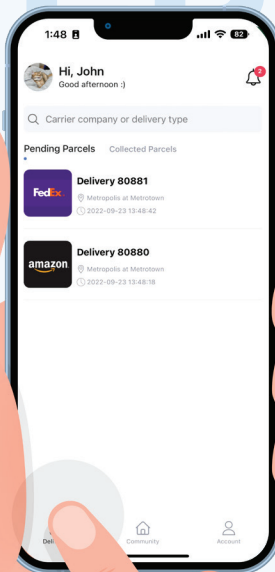

BlueBox Smart lockers are entirely
contactless.

Compared to other Smart Lockers, BlueBox has a unique feature that bypasses the need to use a touch screen or number pad to open up your compartment.

- Open your BlueBox compartment with our remote unlock feature from our BlueBox App, on all compatible devices.
- Manage your parcels with the deliveries tab function on our BlueBox resident app. Whether it's completed pickups, or parcels that are waiting to be picked up, our resident app organizes and presents relevant data to you anytime, anywhere.

BLUEBOX

BlueBox Management System

Our BlueBox Management System, also known as BlueManager, provides buildings the ability to manage BlueBox in several ways:

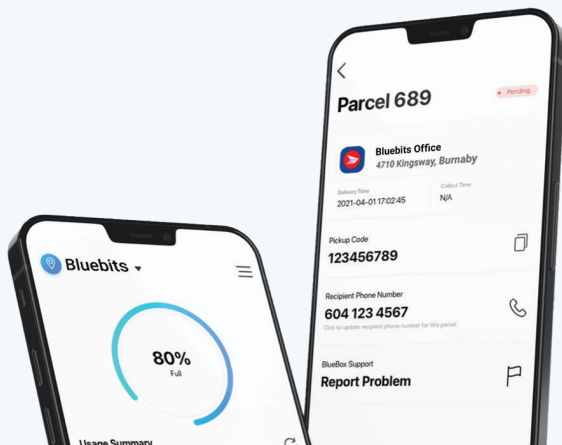

Desktop Portal

See parcel data sorted by date, carrier company, and size to help the building track pending and completed parcels. BlueManager also shows available compartments, preventing a full locker.

Real-Time Analytics

BlueManager collects data such as most frequent carriers, delivery statistics and more!

BlueManager includes an app version for flexibility and portability. Compared to our competitors, BlueBox is a complete solution for improving your parcel reception workflow.

Gain Insight

How often residents order packages? What is the peak time of parcel collection? What carriers enter your facility the most? BlueManager can answer all these questions and more.

Carrier Specific Codes

Buildings can lock the deposit option and provide a code for only carriers to deposit packages.

Govern Late Pickups

Buildings have the option of charging late fees to those who do not pick up their package within the locker storage time limit.

Flexibility is our Priority; Customization is our Strength

BlueBox values collaboration; making us a flexible partner to work with.

Open API

All BlueBox APIs are customizable and ready for integration with any existing systems, even condo management systems already in place. Contact us to discuss more!

Implementation

Hardware installation, software integration as well as on-site training for building managers, residents, and carriers.
